EDUCATION

Northwestern University, Evanston, Illinois

Bachelor of Arts in *Computer Science* and *Mathematics*, Cum Laude, June 2026

Master of Science in *Computer Science*, Anticipated December 2026

Cumulative GPA: 3.92/4.00

Honors: Dean's List 11 of 12 quarters

Relevant Coursework: Machine Learning, Data Structures and Algorithms, Design & Analysis of Algorithms, Software Quality Engineering, Probability and Stochastic Processes, Database Systems, Foundations of Security, Operating Systems

SKILLS

Coding: Skilled in Python, C, C++, C#, SQL, R, Java, JavaScript, Rust, VB, .NET, React, NumPy, TensorFlow, Pandas

Language: Proficient in French

TECHNICAL EXPERIENCE

WPS Health Solutions, Madison, Wisconsin

Application Developer Intern, May 2025 - September 2025

- Collaborated on an agile software development team to enhance 9 enterprise applications
- Mitigated SQL injection vulnerabilities across multiple systems, strengthening application security and protecting sensitive data
- Designed and optimized database structures to support evolving business requirements
- Modified and streamlined Windows Forms interfaces, increasing usability and reducing friction for end users

Tego Innovations, Inc., Evanston, Illinois

Software Developer, June 2024 - August 2025

- Designed, developed, and deployed a fully functional website (tegoplug.com) to drive user engagement and facilitate seamless sales of Tego products
- Engineered animations with CSS Keyframes to add fluidity and motion to the website, elevating interactivity
- Formulated a visual hierarchy with clear signifiers to create an accessible and intuitive website

TECHNICAL PROJECTS

Catan, Evanston, Illinois

Team Member, March 2026 - June 2026

- Recreated the board game Catan in Java with a team of developers, implementing core game logic including trading, resource management, and board handling
- Practiced test-driven development using BVA and EasyMock to write thorough unit and integration tests, isolating dependencies through mocking
- Set up GitHub Actions CI pipelines to automatically run tests and static analysis on every pull request, catching bugs and regressions before merge

WildHacks, Evanston, Illinois

Hackathon Participant, April 2024 & April 2026

- Built a location-based mobile web app (React, Supabase, Leaflet.js) that unlocks digital trading cards when users visit real stadiums, using Haversine distance checks for GPS proximity detection
- Integrated the Strava API to convert workout data into in-game upgrades, and implemented card trading, a best-of-3 battle system, and ELO ranking backed by server-side Postgres logic

LEADERSHIP EXPERIENCE

Philharmonia Orchestra, Evanston, Illinois

Principal String Bassist, September 2022 - Present

- Lead the bass section in rehearsals and performances while fostering a supportive and collaborative environment

Northwestern Flipside, Evanston, Illinois

Vice President, Treasurer, April 2024 - April 2026

- Oversaw financial management and facilitated group meetings for Northwestern's satirical newspaper
